WebCTRL® Add-on

Trend Export
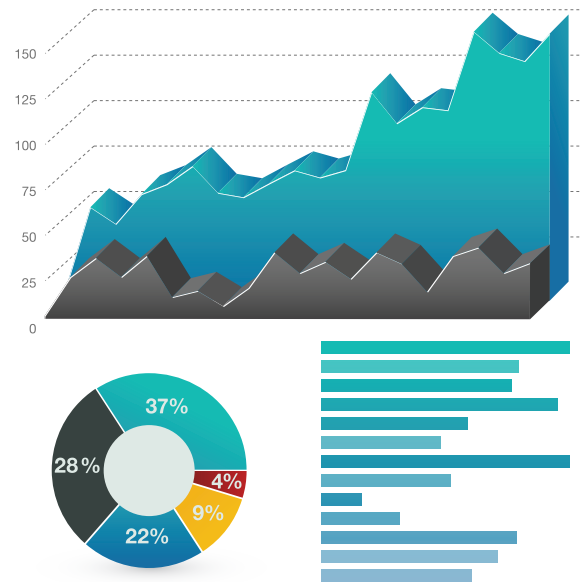

AUTOMATED LOGIC
United Technologies

WebCTRL Add-on

Automated Logic® WebCTRL® add-ons extend the capability of the WebCTRL building automation system.

The Trend Export add-on allows you to specify, manage, and export trend data from the WebCTRL building automation system so that it can be analyzed externally using third party analytics packages or tools. Trend data can be exported on-demand or at scheduled intervals. This provides building operators with a simple and powerful way to view their important building data inside their visualization tool of choice.

WebCTRL® Trend Database — Export — Analytics Packages and Spreadsheets

Key Features and Benefits

- Common .CSV export format for the trend data ensures ease of use outside of the WebCTRL system
- Up to two years of trend data can be exported
- Daily, hourly, and on-demand export options

- Scheduled trend exports only include new historical data received since the last export
- Trend data can be grouped and scheduled for added flexibility

Requires: WebCTRL system v6.5 with the latest cumulative patch

WebCTRL®

The WebCTRL® building automation system gives you the ability to understand your building operations and analyze the results. The WebCTRL system integrates environmental, energy, security and safety systems into one powerful management tool that allows you to reduce energy consumption, increase occupant comfort, and achieve sustainable building operations. Our web-based platform allows building managers to control and access information about their HVAC, lighting, central plant and critical processes on premises or remotely at any time of day.
