WebCTRL® Add-on

Hourly Forecasting

Automated Logic® WebCTRL® add-ons extend the capability of the WebCTRL building automation system.

The hourly forecasting add-on extends the capability of the weather add-on using data from the AccuWeather.com® Weather Service. Once licensed, the hourly forecasting capability is enabled in the weather add-on allowing the WebCTRL building automation system to execute intelligent control strategies based on hourly weather forecast data for the next five days. These predictive control strategies can help building operators maximize occupant comfort, energy efficiency indoors, while also optimizing the use of water in irrigation systems outdoors.

Key Features and Benefits

- Full 5-day, hourly forecast: Temperature | Dewpoint
  Wet bulb | Humidity
  - Hourly precipitation forecast:
    Rain | Snow | Ice
  - Wind conditions forecast:
    Direction | Speed | Gust speed

Includes control program and WebCTRL system graphic for easy deployment

Requires: WebCTRL system v6.5 with the latest cumulative patch applied

The WebCTRL® building automation system gives you the ability to understand your building operations and analyze the results. The WebCTRL system integrates environmental, energy, security and safety systems into one powerful management tool that allows you to reduce energy consumption, increase occupant comfort, and achieve sustainable building operations.
