In today's buildings, the power of an innovative, easy-to-use building automation system is a big deal.

The Automated Logic® WebCTRL® open architecture and support for industry standards makes integration with third party mechanical and electrical building sub-systems easy. The WebCTRL system is capable of supporting multiple protocols over a TCP/IP network allowing many equipment items to be connected directly to the main WebCTRL backbone.

Equipment using BACnet can be connected to an IP, ARCNET, MS/TP, or Point to Point (PTP) network segment. Our Open Systems Integration allows for seamless interconnection to equipment using BACnet, Modbus®, N2®, JBUS, or LonWorks®, as well as an extensive list of proprietary protocols.

Automated Logic continually develops innovative third party integration solutions to add to our Integration resume. Contact your local Automated Logic dealer for a current listing of integration applications or to discuss your custom integration requirements.
