

# Power is in the Platform

## Powerful building automation delivered by controls specialists

Automated Logic delivers a powerful integration platform for managing all of the equipment and systems in your facility. This platform enables Automated Logic partners to apply local, customized expertise to create enterprise-wide building automation solutions.

The WebCTRL® building automation system gives you the ability to understand your building's operations and analyze the results. WebCTRL integrates environmental, energy, security and safety systems into one powerful management tool that provides occupant comfort and energy savings. Our web-based technology allows building managers to control and access information about their HVAC, lighting, central plant and critical processes on premises or remotely at any time of day.

Automated Logic's global network of authorized partners includes system integrators with proven experience in building automation, energy management and control. Our team of more than 150 company branches and independently-owned dealers guides customers through the process of designing, engineering, installing and maintaining each of our building automation products. While our technology sets us apart, our partners bring it all together.
