INTUITIVE BUILDING AUTOMATION SYSTEM

The Automated Logic WebCTRL v8.5 building automation system (BAS) offers an intuitive user interface and powerful tools to help facility managers keep occupants comfortable, manage energy conservation measures, identify key operational problems, and analyze the results. And, best of all, this can all be done anytime/anywhere, through a variety of internet devices, from desktop PCs to web-enabled cell phones and tablets.

WebCTRL[®]

KEY FEATURES AND BENEFITS

The WebCTRL system provides local to global energy management and control, and easily interfaces with all major electrical and mechanical subsystems in the building. With these capabilities and more, facility managers can access, configure, and manage building control systems in ways that best serve their operating needs and budget.

- Powerful, comprehensive building management with intuitive, point-and-click graphical access
- Dynamic color, Scalable Vector Graphic (SVG) floorplans provide a quick overview of building conditions
- Inherent Indoor Environmental Quality Index (IEQ) calculates and displays the overall indoor environmental quality and health of the building
- Powerful WebCTRL Time-lapse™ graphics for analyzing and troubleshooting up to 24 hours of past building operation
- Integrated ASHRAE Guideline 36-compliant Fault Detection and Diagnostics (FDD) to help anticipate, provide insight, and automatically respond to building issues
- Readily participates in energy rebate programs using the OpenADR[®] 2.0 protocol
- Easily use BAS data in enterprise systems with MQTT
- “Staged downloads” reduce downtime of connected HVAC equipment
- Rollback to previous controller firmware, if needed
- Supports BACnet Secure Connect (BACnet/SC), a secure, encrypted datalink layer designed to meet the requirements and constraints of IP infrastructures
- ACxelerate™ VAV Auto-Commissioning tool automates commissioning of VAV terminal units, reducing commissioning time and ensuring proper operation
- Haystack-compatible semantic tagging automatically assigns standard reference names to equipment data
- Internet Protocol Versions IPv6 and IPv4 are supported
- Fully compatible with Automated Logic legacy systems and products since the introduction of our first building automation system in 1984

WebCTRL[®]

The WebCTRL building automation system gives you the ability to understand your building operations and analyze the results. Integrate environmental, energy, security and safety systems into one powerful management tool that helps you reduce energy consumption, increase occupant comfort, and achieve sustainable building operations.
